

Quick Guide

SignalBooster designed for BlackBerry® Wireless Handheld

About

Boost your radio reception with just one touch.

Installation

Extract all contents of the .zip file to a single directory and select the .alx in the "Application Loader" of your "BlackBerry Desktop Manager". Follow the instructions and the program will be installed on your BlackBerry®. A more detailed guide on third party program installation can be found here:

- [Install Applications using a Microsoft Windows Desktop](#)
- [Install Applications using a Mac OS X Desktop](#)

Getting Started

Below is a screen shot of what to expect when you open *SignalBooster*. The main screen displays full overview of the signal status of your device. The number of signal bars shown correspond to the signal strength of your connection.

Who should use *SignalBooster*

For anyone who is affected by weak signals on mobile networks anywhere in the world. *SignalBooster* will boost a weak signal from the cellular network, thus allowing you to make connection in places where you could not have before.

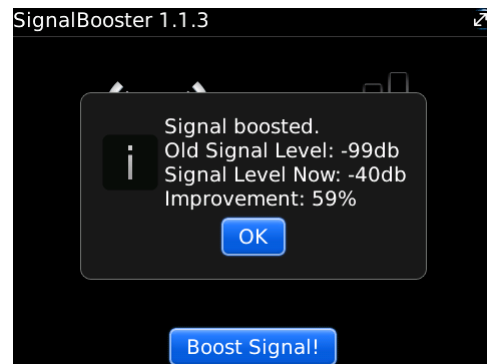

Improved signal strength means faster transfer-rate speeds on all your data communication and also crisp voice quality on your BlackBerry® Wireless Handheld. BlackBerry® users who previously had to walk outside to answer their cellular phone, can now sit in the privacy, comfort and security of their homes or offices and complete a crisp clear conversation with the help of the *SignalBooster*.

How to use *SignalBooster*

When your signal is weak, whether there is static in your calls or your data speeds are slower than usual, use *SignalBooster* to optimize your mobile connection.

Simply click on the "Boost Signal!" button, your voice, data and Internet connections resets. *SignalBooster* then scans for all possible frequency to give you the best possible signal level. A dialog will be presented summarizing the signal boost comparing the previous and new signal level.

Please note that *SignalBooster* does not guarantee signal improvements. Performance will vary based on your location, cellular network and handset.

Requirements: BlackBerry® OS 4.6 or above
